THE BENEFITS OF COMPOSITE DECKING

Created to deliver a softer, more natural aesthetic, the Weathered Grain finish pairs seamlessly with coastal, Hamptons, industrial and modern architectural styles. Designed to replicate the character and depth of naturally aged timber, it brings warmth and authenticity to outdoor spaces while eliminating the need for ongoing staining, sanding or sealing—offering the perfect balance between timeless style and everyday practicality.

PLUS-DEK Weathered Grain is highly durable, low maintenance and engineered for long-term outdoor performance. Featuring a P5 slip rating for superior safety in wet and high-traffic environments, together with a 30-year residential warranty*, it delivers lasting confidence without compromising on design.

*15-year commercial warranty.
